

CAPABILITY STATEMENT

CAPABILITY STATEMENT

2024

C&S Mining Services (C&S) is a West Australian family owned & operated organisation with over 10 years of experience in manufacturing, supplying and installation of quality products utilised in asset protection across the resource, energy & infrastructure industries across Australia.

Our knowledge and onsite experience enables us to provide total wear solutions establishing us as a leading supplier across the mining sector & other heavy duty industries.

OUR PRODUCTS

:: Polyurethane Products:

- Polyurethane Lined Spools
- Polyurethane Primary Scraper Blades
- Polyurethane Skirting
- PolyLite Hard-skirt Liners
- Polyurethane Lagging Options
- Polyurethane Cast Impact Rollers

:: Ceramic Products

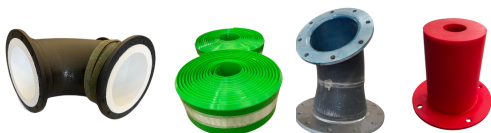

:: Ceramic Lagging

:: Metallic Products - Complex Carbides (Chromium/ Tungsten)

:: Silicon Carbide (RBSIC, SISIC)

:: Conveyor Components:

- Lightweight Composite Rollers
- Heavy Duty Impact Beds (Custom)
- V-ploughs / Diagonal & Diverter Ploughs

FOCUS

Our focus is to become a trusted partner for high-performance Polyurethane, Ceramic, Metallic, Silicon Carbide & Conveyor Component Solutions, designed to meet the unique challenges of the Australian mining industry. With our expertise, innovation, and commitment to quality, we strive to deliver exceptional value and reliability to our clients, helping them achieve operational excellence and maximise productivity in their mining operations.

LOCATION

Our newest premises in Neerabup, Western Australia boasts 1250sqm workshop floor with 2 gantry cranes with capacity of 10Tonne including 8 metres under hook, 4 new polyurethane processing/curing ovens, with spin casting of pipe up to 12 metres and ceramic cutting facility's.

This enables us to offer our products and services with fast efficient lead times safely, all in one facility.

QUALITY ASSURANCE

Our quality management team meticulously inspects all products, guaranteeing top-notch quality and precision during manufacturing at C&S.

We take pride in the effectiveness and reliability of our products and services, adhering to the ISO 9001:2015 quality management systems.

SAFETY & ENVIRONMENT

We are committed to fostering a workplace where safety is paramount and where our team is not only content but also devoted to our safety-first principles.

At C&S Mining Services, we cherish our relationships, especially with our employees, who are instrumental in ensuring timely and budget-conscious delivery of quality work.

Our vision is centered on harnessing the potential of our workforce and advancing our products to offer superior services and pioneering, safer innovations within the resources sector. We take pride in fostering a workplace culture marked by unity and teamwork, while consistently delivering top-notch products and services. Committed to upholding the highest safety standards, we adhere to the ISO 45001:2018 occupational health and safety management system to safeguard our employees.

Furthermore, we are actively engaged in minimising its environmental footprint. Through our dedication to **ISO 14001:2015** environmental management systems, we focus on waste reduction and align with our clients' environmental protocols. Additionally, we are set to install over 100 solar panels in the near future.

TOTAL ASSET PROTECTION FOR THE MINING INDUSTRY

OUR SERVICES

- ⋮ **Specialised Site Services & Consultation**
- ⋮ **Manufacturing, Design, Alterations/Modifications and Rotable Spare Part Refurbishments:**
 - Chutes
 - Impact Beds
 - Deflectors
 - Bucket Wheels
 - Spill-face/Sliding Chute
 - Launderers
 - Pipes/Spools
 - Pulley Refurbishments (ceramic direct bond, rubber or PU lagging)
 - Ceramic Wear Liner Kits
 - Metallic Wear Liner Kits
 - Cutting & Studding Services
- ⋮ **Project Work Delivered to Designated Scope**
- ⋮ **Onsite Audit Services:**
 - Chute Audits
 - Chute Scanning Services
 - Chute Wear Mapping
 - Conveyor System Audits
- ⋮ **Onsite Installation Services:**
 - Wet Plant Upgrades: Polyurethane Lined Pipes & Spools
 - Cyclones Upgrades (ceramic tiling or polyurethane lined).
 - In-house Product Installations
 - Conveyor Hard-skirt Wear Solutions/ Installations
 - Metallic & Ceramic Liner Installations
